

PRESS RELEASE

4 July 2002

Chevalier (Satellink) Ltd Received ISO 9001 Certification

Chevalier (Satellink) Ltd was certified ISO 9001:2000 by the Hong Kong Quality Assurance Agency (HKQAA) and the first-class certification body IQNet in April 2002. The scope of certification includes design, supply, installation and maintenance of extra low voltage electrical system, voice and data networking systems under the accreditation of UKAS (UK), CNACR (China) and HKCAS (HK).

Chevalier (Satellink) Ltd implemented and maintains a quality management system, which fulfills the requirements of ISO 9001:2000, for engineering equipment installation, project management and maintenance service. The system lays down guidelines for continual improvement of service quality, and commits to the fulfillment of customer and statutory requirements. The company also provides appropriate training to its staff and place emphasis on fostering teamwork.

With its outstanding performance, Chevalier (Satellink) Ltd won numerous contracts, including the ELV security and information network construction project for the International Finance Centre II, the A-grade intelligent commercial centre. The project includes installation of digital CCTV and security system, fibre data backbone, SMATV/CABD, walkie talkie & radio paging, public address and octopus card reader system.

Services provided by Chevalier (Satellink) Ltd include design, installation and maintenance for communal antenna broadcasting distribution (CABD), satellite master antenna television (SMATV), security, optic fiber infrastructure networking and voice & Data integrated solution systems. The company also provides project engineering services on extra low voltage (ELV) systems, including closed circuit television (CCTV), radio paging, public address, door phone, door lock, intruder alarm and access control system for major housing estates, private residential blocks, commercial complex and the government sector.
